- And select the Todotix as payment option in the payment selection step.

-
- On placing an order, the module will create a transaction request to the gateway, if all passed data is passed are valid/correct and then the gateway returns a redirect URL. It will be like below:

-
- After payment is successful in the gateway, it will redirect to the callback URL we sent to gateway while creating the transaction. This callback URL will handle the response received from the gateway. Based on the response, we will update the order status as processing or cancel the order. After order is canceled, they will be redirected to the checkout page again and if order is successful then they will be redirected to the success page.
